Practical considerations for antibiotic prophylaxis to prevent postoperative infections in general surgical practice.
Paper read at the Regional Scientific Conference of Association of Surgeons of East and Central Africa

F. RESEARCH PROJECTS CONDUCTED WITHIN THE LAST 10 YEARS

1. Cost effective management of duodenal ulcers in Uganda: Interventions based on a series of seven cases. African Health Sciences 2005; 5(1): 73-78

2. To evaluate the risks of acquiring human immuno-deficiency virus infection through cadavers used in teaching medical students at Makerere medical school.

The study was not completed due to lack of funding

3. Medical audit on problem analysis and implementing changes at the health unit Level using Continuing Medical Education

The study was not finished due to lack of funds and yet we would have loved to cover all the districts in Uganda.

G. RESEARCH PROPOSALS LOOKING FOR FUNDING

1. Tobacco and Health: Is tobacco a hyper accumulator of heavy metals from the soil into its leaves thus promoting lung cancer in the smokers.

2. Is there need for improvement of science and technical education in secondary schools in Uganda?

3. To develop an anthropology and primatology museum for promoting academic excellence in biomedical studies and research at any University Medical School.

H. PROFESSIONAL BODIES MEMBERSHIP

1. Uganda Medical Association.

2. Fellow of the College of Surgeons of East, Central and Southern Africa

3. Association of Surgeons of Uganda.

4. International Society for Plastination.
